

THE POLICY INNOVATION LAB

The laboratory for innovative politics was created as a collaboration with the Faculty of Economics (University of Belgrade) and the Institute for Development and Innovation.

The project aims to support economy students to pursue research topics such as creating and managing public policies, and to gather students, professors, researchers, government institutions, and civil sector to motivate students to tackle topics of public policy, as well as economics and social issues of society.

The students will be motivated to participate through:

- Organized workshops
- Solving case studies
- Organized guest lectures
- Organized internships
- Visiting government and the non-government sector to meet the main decision-makers in these sectors
- Competition for the best student idea on how to work tackle public policy.

The result of the project is to help economic students get employment as experts in creating and managing public policies.

Laboratory for innovative politics is created as an open, collaborative place where students may express their ideas on how to manage projects connected to public policies.

Through Laboratory for innovative politics students will analyze issues of economic politics, to develop innovative and real solutions to issues, and in doing so they will be forced to combine research and fieldwork as methods.

The involvement of economy students in Laboratory for innovative politics will help develop new ways of thinking and help create concrete solutions to the challenges our society is facing.

Laboratory for innovative politics will with its partners from both the public and private sectors prepare case studies that students will solve through their flexibility and experimental approach. This combination will lead to developing new skills in different disciplines that will equip students for potential professional challenges they will face in the future and will be integrated into their academic pursuits.
